# WHO WE ARE

Luminor Group is a young, ambitious, and fast-growing engineering company based in Batumi, Georgia, specializing in cutting-edge aluminium façade and cladding systems. Established in 2024 and proudly a member of Anta Holding, we are driven by a passion for modern architectural design, technical precision, and sustainable building solutions. Our diverse team of skilled professionals is committed to delivering innovative, high-quality, and environmentally responsible results across a wide range of projects. Guided by our core values—authenticity, consistency, professionalism, innovation, adaptability, and social responsibility—we are shaping the future of architecture in Georgia and beyond.

# ABOUT US

**Luminor Group** Founded on December 19, 2024, in Batumi, Georgia, **Luminor Group** is dedicated to revolutionizing modern architectural design through top-tier aluminium solutions. Specializing in a wide range of services such as aluminium composite panel cladding, decorative cladding, balustrade systems, structural façades, silicone façades, skylights, doors, windows, and canopies, we are committed to delivering innovative and high-quality products that elevate building aesthetics and performance.

At Luminor, our mission is built on the foundation of six core values: authenticity, consistency, professionalism, innovation, adaptability, and social responsibility. These principles guide every project, ensuring that we meet and exceed our clients' expectations while building long-lasting partnerships.

At the heart of **Luminor Group** is Mr. Ahmet Er, the company's partner and chief engineer. With nearly 30 years of experience in the aluminium and construction industries. His career began at ÖZTAŞ İnşaat (1995–2005), where he built a solid foundation in construction engineering. In 2012, Mr. Er relocated to Georgia, where he continued to contribute to major architectural and structural projects across the region. He officially became a partner and cornerstone of Luminor Group in late 2024, assembling a skilled team of professional engineers and experts dedicated to raising the standards of façade engineering and aluminium solutions.

As a young and rapidly growing company, **Luminor Group**, a proud member of **Anta Holding**, is already proving itself as a trusted partner in Georgia's evolving architectural landscape. Our projects, such as the Caucasus School and University Batumi Branch and the **ANTA Holding** Logistics Center and Head Office, reflect our ambition and capability to take on complex and impactful developments. These works showcase our dedication to precision, innovation, and customer satisfaction—key traits that define our company's forward momentum.

We also place strong emphasis on social responsibility and environmental protection. By integrating eco-conscious practices, using sustainable materials, ventilated façade materials and promoting energy efficiency, we aim to reduce our environmental impact while contributing to a more responsible future in architecture.

Looking ahead, **Luminor Group** remains committed to shaping the future of modern architecture and design—delivering cutting-edge aluminium façade solutions that combine visual elegance with structural integrity, all while remaining rooted in our values and a deep commitment to sustainability.
